

CONSTITUENT ADVISORY:

LOWELL AVENUE/WASHINGTON STREET INTERSECTION  
PEDESTRIAN CROSSING RE-DESIGN AND RE-CONSTRUCTION PROJECT

JULY 21, 2011

The City is in the process of re-designing and re-constructing the intersection of Washington Street and Lowell Avenue for the purpose of better accommodating pedestrian access and safety. This project is funded with Community Development Block Grant (CDBG) monies.

The project plans can be viewed through the following link:

<http://www.newtonma.gov/Planning/development-high-interest.htm>

To date, perimeter curbing has been placed and a new sidewalk has been poured on the northeast corner of the intersection. On the other three corners of the intersection, temporary curbing will be deployed to enable residents, as well as roadway and sidewalk users, to become familiar with the design features before actual re-construction is undertaken as scheduled later in August.

For those interested in relaying comments to me, I am available at: 617-796-1701, [slinsky@newtonma.gov](mailto:slinsky@newtonma.gov), or at my next monthly constituent hour at the Senior Center, located at 345 Walnut Street, scheduled for Friday, August 5<sup>th</sup> beginning at 8:30 AM.
